

FFS White Paper

Published: 29th May 2021

1. Introduction

Decentralised Finance has received significant amount of popularity over the last 2 years with \$58 billion of total value locked in DeFi contracts as of May 2021. Such popularity came at a cost, thousands of scams and rug pulls are being executed on a daily basis in the otherwise flourishing ecosystem. As DeFi is by definition an unregulated field, it is a responsibility of decentralised communities to fight with the scammers. FFS wants to build such a community and provide necessary tools for its members to ease their trading experience and avoid scams and rug-pulls.

2. FFS Token

FFS is a community driven, fair launched DeFi Token. FFS token has Total Supply of 1,000,000,000,000,000. Two simple functions are triggered on each transaction: Reflection and LP Acquisition. FFS token will be used to fund the marketing and development of FFS tools.

2.1 Reflection

Reflection function takes 4% of every FFS token transaction and automatically splits 2% of this fee across all FFS holders and another 2% towards marketing and development wallet. Token holders don't need to stake or wait for fees to be transferred to them. All transactions are immediately directed towards the holder's wallets. The main aim of this feature is to punish the flippers and reward the holders.

2.2 LP Acquisition

Having a healthy liquidity is important to establish a solid price floor for the token and protect the investors. For these 2 reasons FFS development team intentionally chose a relatively large 11% fee on every transaction to go to LP. Similar to reflection feature, LP Acquisition punishes the flippers and rewards the holders with decreasing price volatility.

3. FFS Tools

FFS development funds will be used to develop a series of tools and dApps that will help traders to choose safe and rug-pull free projects to invest in on the Binance Smart Chain, with possible bridging to other smart chains in the future. Our first such tool is going to be a rug-pull and honeypot checker. As FFS is a community driven token, all future developments are going to be based on community needs with decisions being influenced by the results of community input.

4. Roadmap

As FFS is evolving, the Roadmap is subject to change based on market conditions and community needs.

Q2 2021.

- FFS Presale and Launch
- Initial Promotion and Marketing
- YouTube/TikTok Partnerships
- Website Launch

- Twitter, Telegram contests
- Beta version of the Rug-Pull screening tool

Q3 2021

- Community to decide the next dApp to be developed
- Final version of the Rug-Pull screening tool
- Beta version of the 2nd dApp
- Additional Marketing push
- Charity Donations

Q4 2021

- Formal Launch of the Ape Foundation Charity
- Implementation of the voting system based on the number of tokens held
- NFTs for top holders and early adopters
- New De-Fi projects and dApps designed by apes for apes
